

XC/OM XactMan® Order Management

Quantum Software's XC/OM continues to be one of the most innovative tools available today. XC/OM offers businesses an alternative to expensive conversions to other ERP systems. The current release of XC/OM includes the most commonly used List, Maintenance, Transaction, and Report commands, as well as complete Sales Order processing. New features include the ability to export data to other Windows based products such Microsoft Excel and Word. XC/OM also has an innovative feature that allows users to customize the screens to their work environment. The XC/OM workspace contains the MyXactMan® desktop which, allows users to create shortcuts to frequently used commands.

XC/OM includes full sales order functionality - Real time access is provided in the creation of Sales Orders to the OMAR databases via the intuitive GUI interface. Drop-down lists are provided for easy and accurate data entry. XC/OM client/server technology allows the user to run multiple commands within a single session allowing non-interrupted workflow.
